Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE <u>3</u> MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.		
- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 3-27 are pending in this application.

Priority

Applicant's claim for priority from the PCT/US00/27503 and the U.S. Provisional application 60/158,660 is acknowledged. However, the PCT application and the provisional application upon which priority is claimed fail to provide adequate support under 35 U.S.C. 112 for claims 14-21, 24-25 and 27 of this application. See the rejection of 35 U.S.C. 112, first paragraph below. Accordingly, this application is not eligible to the benefit of earlier filing dates and the effective filing date is June 25, 2002.

Claim Rejections - 35 U.S.C. § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14-21, 24-25 and 27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 1624

In claims 14 and 27, it is recited that "R₁ and R₂ can be taken together to form a fused heterocyclic ring, a fused aromatic ring, a fused heteroaromatic ring with the 3-aminodihydouracil or 3-aminodihydrothiouracil ring". This statement is not adequately supported by the specification. The specification on page 4, lines 18-20 provides that:

When n is 1, R₁ and the member carbon atom adjacent to the carbon atom containing R₂ may instead together form a ring system; said ring system being carbocyclic ring, heterocyclic ring, or heteroaromatic ring.

As per the specification, R₁ and the adjacent carbon atom together may form a ring system and not R₁ and R₂ together. The exemplified compound at page 8, lines 5-7 also shows wherein R₁ and the adjacent carbon together form a ring.

The generic disclosure nor the examples provide any support for the above mentioned subject matter. Therefore, it is concluded that the claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as

Art Unit: 1624

the invention. Claims 3 and 14 do not provide a definition for the variable ' R ' which is present in the amino acid ester formula.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 14-21 and 24-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu et al., (Tetrahedron Letters, 41(8), pages 1159-63, 2000). The instant claims read on reference disclosed process, see reaction scheme 1 in page 1160 wherein the hydrazine compound 3 is reacted with amino acid ester 4 to give the corresponding 3-aminodihydrouracil product 6.
2. Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Wu et al., (Tetrahedron Letters, 41(8), pages 1165-69, 2000). The instant claims read on reference disclosed process, see the reaction scheme in Fig. 1 on page 1166.

Allowable Subject Matter

Claims 3-13 and 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
